

# IQBoard PCT

Based on the projected capacitive technology, IQBoard PCT enables multi-touch operation. Wherever users touch on the panel will lead to the changed capacity, then the coordinator of specific touch point will be worked out. In pursuit of the high level of comfort, interaction and user-friendly experience, the IQBoard PCT screen allows users to experience and enjoy the process as well. Moreover, it is free from any wear when users touch the screen with fingers and reaches lifetime up to 30 years with its stable performance.

## Product Highlights

**Up to 30-point touch on the large screen with much fun.**

**Fast touch response.**

**High precision and one-time calibration**

**Directly write & wipe with whiteboard pens.**

**Customized sizes up to the maximum length of 14m.**

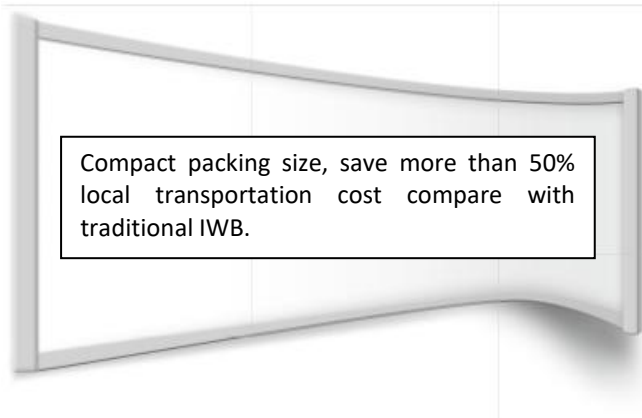

**Convenient for transport and less cost with inclusive roll design.**

# Working Principle

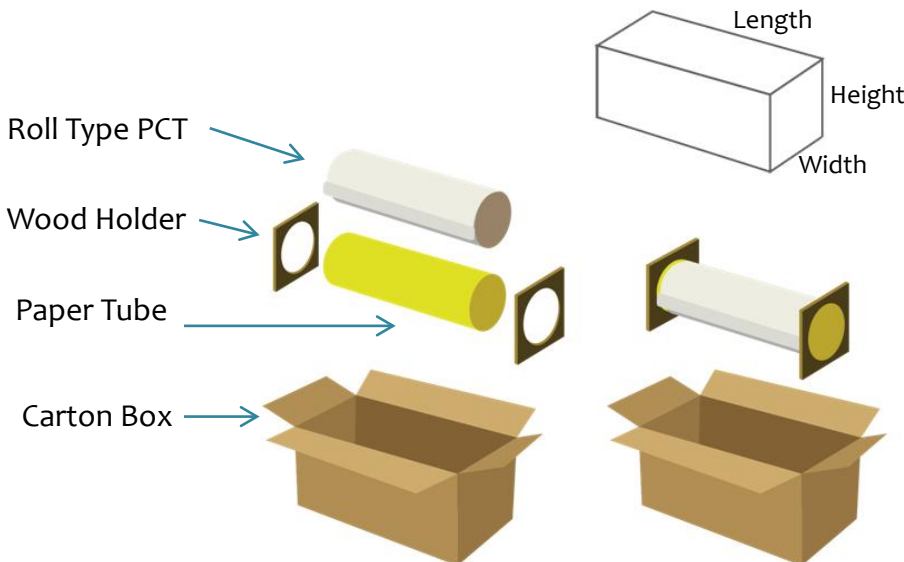

1. Finger touches the PCT.
2. Analog signal generated and sent to multiplexer.
3. A/D converter converts the signal to digital, computing by DSP and then send the coordinate to host computer.
