- **Anti-glare Glass**  
3mm Hardened Anti-Reflection Safety Class(MOHS7).

## Feature

### Groundbreaking zero bonding technology

Traditional air bonding technology leaves air gap between the covered glass and the LCD panel, making room for possible dust and moisture. The upgrade of the bonding technology makes the air gap almost invisible to improve the overall performance of the display to another level, physically and technically.

## Feature

### Fully upgraded ultra fine touch technology

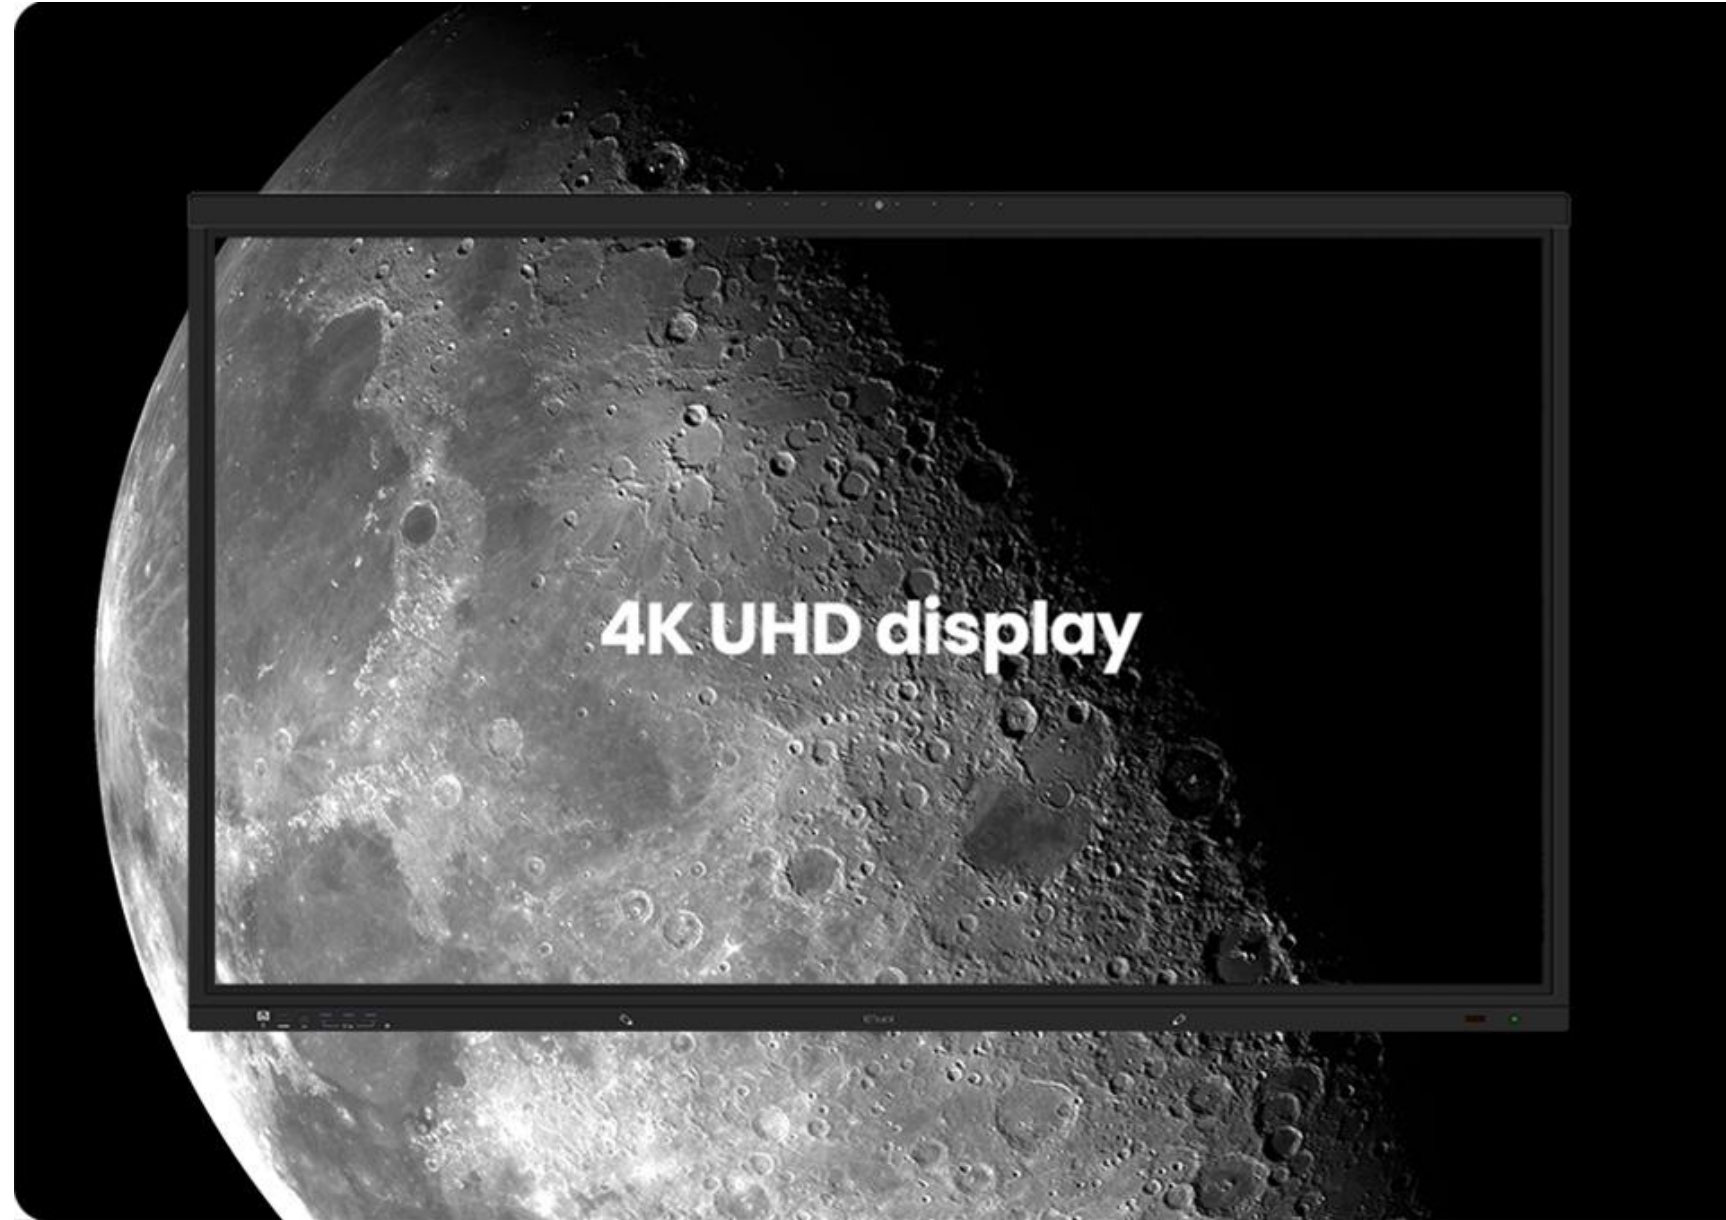

IQTouch T900 Series support 20-point touch, instant response and high precision to guarantee ultra fine touch experience. Zero bonding technology ensures high proximity between fingertip and writing trail, which offers more vivid writing experience on the paper.

## Feature

### **4K UHD display presents realistic visual effect.**

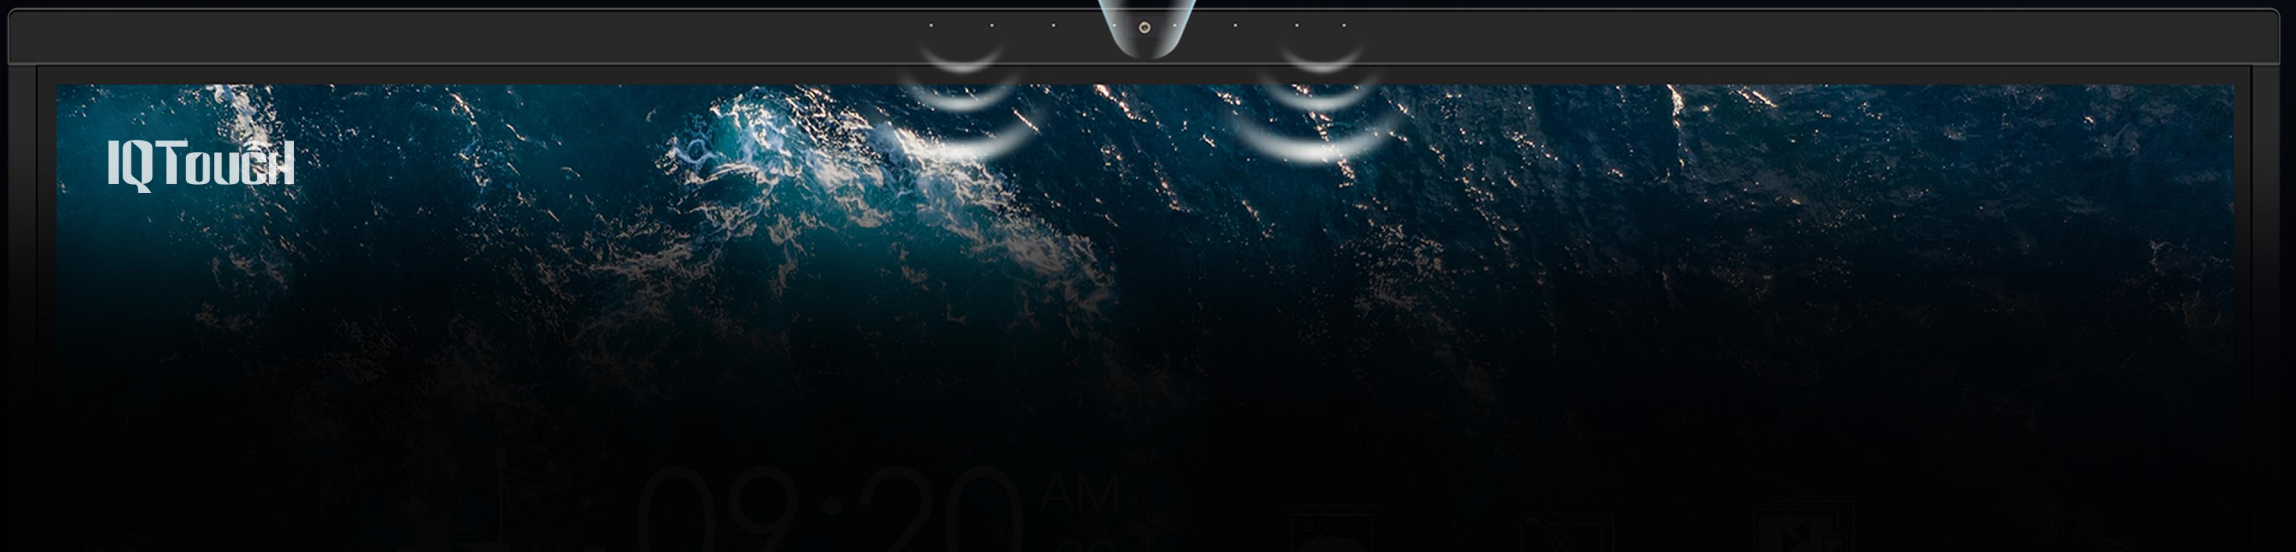

4K UHD delivers crystal clarity with high contrast, high brightness and high range NTSC (>80% NTSC). Combined with zero bonding technology, it brings us a higher-definition visual experience and an immersive environment by reducing parallax and enhancing readability.

## Feature

### Start a video conference right now

By integrating a built-in 4K camera and 6 microphone arrays with noise reduction, TB900Pro is easy to set up a video conferencing environment immediately. Experience a high-quality video conference supported by the high-definition image with 12 million pixels and the ability of long-distance sound pickup.

# Feature

## Intuitive IQ OS for Android UI

We are committed to creating a humanized interface to make user operations more convenient and effortless. Various styles of themes can fit into education or corporate environment, with abundant tools available at your fingertips.

## Feature

### Abundant interfaces with Dual USB Type-C

Enable external connection with multiple devices through various interfaces: USB, HDMI, Audio, RS232 etc. Both TB900Pro and TB900 provide 2 multi-functional USB Type-C ports on the front and backside of the display, which enable power charging, audio and video transmission and the maximum speed is up to 10 Gbps. Even reverse touch control from IFP to PC can be realized.

# Feature

## HDMI output to enjoy larger view

The HDMI out port on both TB900Pro and TB900 makes it possible to extend the IFP screen to larger displays, so that when the speaker annotates on the IFP, it's easier for audience to see the presentation on the other big screen.

# Feature

## Smart light sensor for adaptive brightness

The light sensor of TB900Pro and TB900 is capable of detecting the amount of light in the room and adjusting the screen brightness accordingly, making the IFP more comfortable to the eyes of the audience.

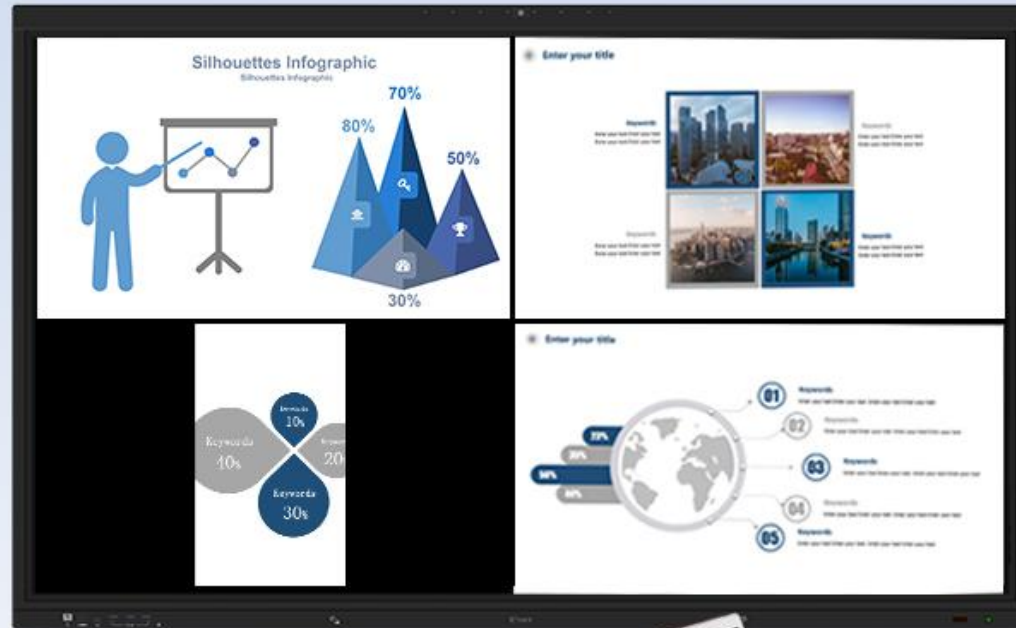

# Feature

## Windows Ink compatible for easy annotation

Support directly writing on MS Office documents, saving annotations in the original file and sharing to other as well as hand gesture recognition like select and zoom with your fingertips, erase with fist. With multi-functional collaborative Windows Ink, you will never lose a thought

## Feature

### Wireless screen sharing catches your instant inspiration

With built-in Eshare Pro software, share your screen wirelessly right away when you get an idea. Creating brainstorming atmosphere for your thoughts to flow freely. No need to plug cables anymore. Just show your instant inspiration without waiting.
