Projected Capacitive (PCAP) touch technology & Optical Bonding technology

- Super sensitive screen operated by only slight touch.
- Frameless and flat touchscreen to deliver the most accurate touch experience
- Combined PCAP touch with optical bonding technology to ensure pen-on-paper writing

4K UHD display

Embracing optical bonding, the screen of 4K UHD delivers crystal clarity and higher readability with high contrast, high brightness and high range NTSC (>80% NTSC). Vibrant colors and lifelike images create an immersive environment.

Ultra fine touch redefines natural writing

PACP touch and optical bonding ensures ultra fine touch to empower the screen instant response and high precision, revitalizing more vivid and natural writing experience on the paper.
